Plant Science, 88 (1993) 241–243
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 88 (1993)

Abscisic acid, *Citrus*, salt tolerance, salt-associated protein, NaCl, osmotic stress, 129
Abscisic acid, somatic embryogenesis, endogenous hormones, auxin, *Hevea brasiliensis*, 91
Acclimatization, leaf discs, callus, regeneration of shoots, leaf abscission, modified Woody Plant Medium, regeneration of plants, transplantation, 107
Acetolactate synthase, transgenic plants, valine, resistance, 159
Acid citrus, protoplast-fusion, cybrids, rDNA, mtDNA, 195
Agrobacterium, black locust, hairy root, legume, transformation, 149
Agrobacterium tumefaciens strain 82.139, plant regeneration, micropropagation, photoperiodism, *Sesbania rostrata*, 113
Agrobacterium tumefaciens, flax, β-glucuronidase, *Linum usitatissimum*, 61
Alfalfa, potassium, proline, thioproline, somatic embryogenesis, 185
Amino acid sequence, plant mitochondria, RNA editing, ATP synthase subunit 9, *atp9* pseudogene, potato, 45
Ammonium, conifer tissue culture, nitrogen nutrition, *Pinus strobus*, 169
Anther culture, *Solanum tuberosum*, growth regulators, potato, ploidy level, 83
Antifolic, carrot cultures, folates, culture growth, 97
ATP synthase subunit 9, plant mitochondria, RNA editing, *atp9* pseudogene, potato, amino acid sequence, 45
atp9 pseudogene, plant mitochondria, RNA editing, ATP synthase subunit 9, potato, amino acid sequence, 45
Auxin, somatic embryogenesis, endogenous hormones, abscisic acid, *Hevea brasiliensis*, 91

Black locust, *Agrobacterium*, hairy root, legume, transformation, 149

Ca^{2+}, NADP-specific glutamate dehydrogenase, fusicoccin, fusicoccin-binding protein, *Triticum durum*, 19
Callus, leaf discs, regeneration of shoots, leaf abscission, modified Woody Plant Medium, regeneration of plants, acclimatization, transplantation, 107
Carrot cultures, folates, antifolic, culture growth, 97
Carrot, glyphosate, gene amplification, 5-enolpyruvylshikimate-3-phosphate synthase, 219
Catharanthus roseus, cytidine diphosphate-diacylglycerol synthase, microsomal membranes, suspension cultured plant cells, 13
Cytidine diphosphate-diacylglycerol synthase, *Catharanthus roseus*, microsomal membranes, suspension cultured plant cells, 13
Cell suspensions, *Theobroma cacao*, proplastids, isolation, fatty acid biosynthesis, 175
Cereals, tritordeum, in vitro regeneration, protoplasts, 209
Chemiluminescence, *Phytophthora* spp, water-soluble glucan, suppressor, elicitor, Solanaceae, superoxide, 141
Chloroplast-encoded genes, light-regulation, *Vigna aconitifolia*, 55
Citrus, salt tolerance, salt-associated protein, abscisic acid, NaCl, osmotic stress, 129
Conifer tissue culture, ammonium, nitrogen nutrition, *Pinus strobus*, 169
Cotton fibers, ovule culture, monensin, tunicamycin, 229
Crystalloid protein cDNA, embryogenesis, *Picea glauca*, crystalloid transcripts, desiccation (Lea) transcripts, nucleic acid hybridization, 25
Crystalloid transcripts, embryogenesis, *Picea glauca*, desiccation (Lea) transcripts, crystalloid protein cDNA, nucleic acid hybridization, 25
Culture growth, carrot cultures, folates, antifolic, 97
Cybrids, protoplast-fusion, acid citrus, rDNA, mtDNA, 195

Daucus carota, embryogenesis, oleosins, starch, storage proteins, triacylglycerol, 1
Desiccation (Lea) transcripts, embryogenesis, *Picea glauca*, crystalloid transcripts, crystalloid protein cDNA, nucleic acid hybridization, 25
Dianthus caryophyllus, *Dianthus chinensis*, protoplast fusion, somatic hybridization, iodoacetamide, plant regeneration ability, 203
Dianthus chinensis, *Dianthus caryophyllus*, protoplast fusion, somatic hybridization, iodoacetamide, plant regeneration ability, 203
DNA methylation, gene activation, β-glucuronidase, kanamycin resistance, *Solanum tuberosum* L. cv. Bintje, 73
DNA molecular marker, *Nicotiana tabacum*, HRS60-repeated DNA sequences, genus *Nicotiana*, 39

Elicitor, *Phytophthora* spp, water-soluble glucan, suppressor, Solanaceae, chemiluminescence, superoxide, 141
Embryogenesis, *Daucus carota*, oleosins, starch, storage proteins, triacylglycerol, 1
Embryogenesis, *Picea glauca*, crystalloid transcripts, desicca-

tion (Lea) transcripts, crystalloid protein cDNA, nucleic acid hybridization, 25
Endogenous hormones, somatic embryogenesis, auxin, abscisic acid, *Hevea brasiliensis*, 91
5-Enolpyruvylshikimate-3-phosphate synthase, glyphosate, carrot, gene amplification, 219

Fatty acid biosynthesis, *Theobroma cacao*, cell suspensions, proplastids, isolation, 175
Flax, *Agrobacterium tumefaciens*, β-glucuronidase, *Linum usitatissimum*, 61
Folates, carrot cultures, antifolic, culture growth, 97
Fusicoccin, NADP-specific glutamate dehydrogenase, fusicoccin-binding protein, Ca^{2+}, *Triticum durum*, 19
Fusicoccin-binding protein, NADP-specific glutamate dehydrogenase, fusicoccin, Ca^{2+}, *Triticum durum*, 19

Gene activation, DNA methylation, β-glucuronidase, kanamycin resistance, *Solanum tuberosum* L. cv. Bintje, 73
Gene amplification, glyphosate, carrot, 5-enolpyruvylshikimate-3-phosphate synthase, 219
Genus *Nicotiana*, *Nicotiana tabacum*, HRS60-repeated DNA sequences, DNA molecular marker, 39
Germination, wheat, *N*-malonyl-D-tryptophan, tryptophan, 121
β-Glucuronidase, *Agrobacterium tumefaciens*, flax, *Linum usitatissimum*, 61
β-Glucuronidase, DNA methylation, gene activation, kanamycin resistance, *Solanum tuberosum* L. cv. Bintje, 73
Glyphosate, carrot, gene amplification, 5-enolpyruvylshikimate-3-phosphate synthase, 219
Growth regulators, *Solanum tuberosum*, anther culture, potato, ploidy level, 83

Hairy root, *Agrobacterium*, black locust, legume, transformation, 149
Hevea brasiliensis, somatic embryogenesis, endogenous hormones, auxin, abscisic acid, 91
HRS60-repeated DNA sequences, *Nicotiana tabacum*, DNA molecular marker, genus *Nicotiana*, 39

In vitro regeneration, tritordeum, cereals, protoplasts, 209
Iodoacetamide, *Dianthus caryophyllus*, *Dianthus chinensis*, protoplast fusion, somatic hybridization, plant regeneration ability, 203
Isolation, *Theobroma cacao*, cell suspensions, proplastids, fatty acid biosynthesis, 175

Kanamycin resistance, DNA methylation, gene activation, β-glucuronidase, *Solanum tuberosum* L. cv. Bintje, 73

Leaf abscission, leaf discs, callus, regeneration of shoots, modified Woody Plant Medium, regeneration of plants, acclimatization, transplantation, 107
Leaf discs, callus, regeneration of shoots, leaf abscission, modified Woody Plant Medium, regeneration of plants, acclimatization, transplantation, 107
Legume, *Agrobacterium*, black locust, hairy root, transformation, 149
Light-regulation, chloroplast-encoded genes, *Vigna aconitifolia*, 55
Linum usitatissimum, *Agrobacterium tumefaciens*, flax, β-glucuronidase, 61

N-Malonyl-D-tryptophan, wheat, germination, tryptophan, 121
Micropropagation, plant regeneration, photoperiodism, *Sesbania rostrata*, *Agrobacterium tumefaciens* strain 82.139, 113
Microsomal membranes, *Catharanthus roseus*, cytidine diphosphate-diacylglycerol synthase, suspension cultured plant cells, 13
Modified Woody Plant Medium, leaf discs, callus, regeneration of shoots, leaf abscission, regeneration of plants, acclimatization, transplantation, 107
Monensin, cotton fibers, ovule culture, tunicamycin, 229
mtDNA, protoplast-fusion, cybrids, acid citrus, rDNA, 195

NaCl, *Citrus*, salt tolerance, salt-associated protein, abscisic acid, osmotic stress, 129
NADP-specific glutamate dehydrogenase, fusicoccin, fusicoccin-binding protein, Ca^{2+}, *Triticum durum*, 19
Nicotiana tabacum, HRS60-repeated DNA sequences, DNA molecular marker, genus *Nicotiana*, 39
Nitrogen nutrition, ammonium, conifer tissue culture, *Pinus strobus*, 169
Nucleic acid hybridization, embryogenesis, *Picea glauca*, crystalloid transcripts, desiccation (Lea) transcripts, crystalloid protein cDNA, 25

Oleosins, *Daucus carota*, embryogenesis, starch, storage proteins, triacylglycerol, 1
Osmotic stress, *citrus*, salt tolerance, salt-associated protein, abscisic acid, NaCl, 129
Ovule culture, cotton fibers, monensin, tunicamycin, 229

Photoperiodism, plant regeneration, micropropagation, *Sesbania rostrata*, *Agrobacterium tumefaciens* strain 82.139, 113
Phytophthora spp, water-soluble glucan, suppressor, elicitor, Solanaceae, chemiluminescence, superoxide, 141
Picea glauca, embryogenesis, crystalloid transcripts, desiccation (Lea) transcripts, crystalloid protein cDNA, nucleic acid hybridization, 25
Pinus strobus, ammonium, conifer tissue culture, nitrogen nutrition, 169
Plant mitochondria, RNA editing, ATP synthase subunit 9, *atp9* pseudogene, potato, amino acid sequence, 45
Plant regeneration ability, *Dianthus caryophyllus*, *Dianthus chinensis*, protoplast fusion, somatic hybridization, iodoacetamide, 203
Plant regeneration, micropropagation, photoperiodism, *Sesbania rostrata*, *Agrobacterium tumefaciens* strain 82.139, 113

Ploidy level, *Solanum tuberosum*, anther culture, growth regulators, potato, 83
Potassium, alfalfa, proline, thioproline, somatic embryogenesis, 185
Potato, *Solanum tuberosum*, anther culture, growth regulators, ploidy level, 83
Potato, plant mitochondria, RNA editing, ATP synthase subunit 9, *atp9* pseudogene, amino acid sequence, 45
Proline, alfalfa, potassium, thioproline, somatic embryogenesis, 185
Proplastids, *Theobroma cacao*, cell suspensions, isolation, fatty acid biosynthesis, 175
Protoplast fusion, *Dianthus caryophyllus*, *Dianthus chinensis*, somatic hybridization, iodoacetamide, plant regeneration ability, 203
Protoplast-fusion, cybrids, acid citrus, rDNA, mtDNA, 195
Protoplasts, tritordeum, cereals, in vitro regeneration, 209

rDNA, protoplast-fusion, cybrids, acid citrus, mtDNA, 195
Regeneration of plants, leaf discs, callus, regeneration of shoots, leaf abscission, modified Woody Plant Medium, acclimatization, transplantation, 107
Regeneration of shoots, leaf discs, callus, leaf abscission, modified Woody Plant Medium, regeneration of plants, acclimatization, transplantation, 107
Resistance, acetolactate synthase, transgenic plants, valine, 159
RNA editing, plant mitochondria, ATP synthase subunit 9, *atp9* pseudogene, potato, amino acid sequence, 45

Salt tolerance, *Citrus*, salt-associated protein, abscisic acid, NaCl, osmotic stress, 129
Salt-associated protein, *Citrus*, salt tolerance, abscisic acid, NaCl, osmotic stress, 129
Sesbania rostrata, plant regeneration, micropropagation, photoperiodism, *Agrobacterium tumefaciens* strain 82.139, 113
Solanaceae, *Phytophthora* spp, water-soluble glucan, suppressor, elicitor, chemiluminescence, superoxide, 141
Solanum tuberosum L. cv. Bintje, DNA methylation, gene activation, β-glucuronidase, kanamycin resistance, 73
Solanum tuberosum, anther culture, growth regulators, potato, ploidy level, 83
Somatic embryogenesis, alfalfa, potassium, proline, thioproline, 185
Somatic embryogenesis, endogenous hormones, auxin, abscisic acid, *Hevea brasiliensis*, 91
Somatic hybridization, Dianthus caryophyllus, *Dianthus chinensis*, protoplast fusion, iodoacetamide, plant regeneration ability, 203
Starch, *Daucus carota*, embryogenesis, oleosins, storage proteins, triacylglycerol, 1
Storage proteins, *Daucus carota*, embryogenesis, oleosins, starch, triacylglycerol, 1
Superoxide, *Phytophthora* spp, water-soluble glucan, suppressor, elicitor, Solanaceae, chemiluminescence, 141
Suppressor, *Phytophthora* spp, water-soluble glucan, elicitor, Solanaceae, chemiluminescence, superoxide, 141
Suspension cultured plant cells, *Catharanthus roseus*, cytidine diphosphate-diacylglycerol synthase, microsomal membranes, 13

Theobroma cacao, cell suspensions, proplastids, isolation, fatty acid biosynthesis, 175
Thioproline, alfalfa, potassium, proline, somatic embryogenesis, 185
Transformation, *Agrobacterium*, black locust, hairy root, legume, 149
Transgenic plants, acetolactate synthase, valine, resistance, 159
Transplantation, leaf discs, callus, regeneration of shoots, leaf abscission, modified Woody Plant Medium, regeneration of plants, acclimatization, 107
Triacylglycerol, *Daucus carota*, embryogenesis, oleosins, starch, storage proteins, 1
Triticum durum, NADP-specific glutamate dehydrogenase, fusicoccin, fusicoccin-binding protein, Ca^{2+}, 19
Tritordeum, cereals, in vitro regeneration, protoplasts, 209
Tryptophan, wheat, germination, *N*-malonyl-D-tryptophan, 121
Tunicamycin, cotton fibers, ovule culture, monensin, 229

Valine, acetolactate synthase, transgenic plants, resistance, 159
Vigna aconitifolia, chloroplast-encoded genes, light-regulation, 55

Water-soluble glucan, *Phytophthora* spp, suppressor, elicitor, Solanaceae, chemiluminescence, superoxide, 141
Wheat, germination, *N*-malonyl-D-tryptophan, tryptophan, 121
